

Breaking Through the Spiral Ceiling: An American Woman Becomes a DNA Scientist

In *Breaking Through the Spiral Ceiling*, Laura L. Mays Hoopes traces her development as a woman biologist, how she fell in love with DNA but encountered discouraging signals from men in science, how she married and balanced both family and career, and why she's glad not to be a Harvard professor. An inspiring memoir about a young woman going into science in the 1960s and 1970s, this is her first book since authoring a textbook in 1981 (*Genetics: A Molecular Approach*, Macmillan).
