

Training Across Multiple Locations: Developing a System That Works (Publication in the Berrett-Koehler Organizational Performance)

-- Focuses on the evolution of multiple-location training and development systems. This book offers a model for developing a complex training organization. It shows how distance learning technology, including intranets and Web- and computer-based training, are central to managing multipoint training. Examples from a dozen companies and their chosen technology platforms show real-life applications. Included are a questionnaire to review the various locations and suggestions to ensure the viability of plans.

To develop students understanding and knowledge of learning theories and To explore and evaluate the various methods of management development, and with self-development and organisational development. works/new artefacts, effective solutions to real-life problems or new ..
