

The Transition to Reality: Directions for Canadian Industrial Strategy

First published in 1980, *The Transition to Reality* is a look into Canada's industrial health, or lack thereof. Author John Shepherd criticizes the contemporary lack of a conscious industrial strategy in Canada, asserting that the need for a coherent policy was masked by essentially ephemeral manufacturing growth in the 1960s. He suggests policymakers focus on the mechanics of producing wealth, rather than merely distributing it. *The Transition to Reality* is a bracing and often contrary entry into the vibrant political economy debates of the early 1980s.

Creative Canada sets the direction for concerted action. It provides a roadmap for the transition ahead, and for a whole-of-government approach to our creative economy. .
