

Practical Data Management for Risk Data Aggregation: BCBS 239 Compliance

In the years leading up to the 2008 financial crisis, policymakers and investors lacked sufficient data and supervision to anticipate emerging threats to financial stability or assess how shocks to one financial firm could impact the system as a whole. In the aftermath of financial crisis, it is apparent to leading nations that financial stability requires increasing the intensity and effectiveness of supervision. To achieve that, various laws and regulations have been adopted to improve the supervision of financial institutions especially SIFIs. The most notably of those relating to data management is BCBS 239 (Risk Data Aggregation principles). This book describes the approach and method to establish a good data management practice in order to satisfy the requirements and principles outlined in BCBS 239.
